

RONAK PATEL

AI Automation & Agentic Systems Developer

Surat, Gujarat, India • +91 8141876971 • khuntronak5@gmail.com • github.com/ronakkhunt28-create

PROFESSIONAL SUMMARY

AI Automation & Agentic Systems Developer specializing in Python, FastAPI, and n8n to build reliable, production-style agentic workflows, RAG pipelines, and API/webhook integrations. Leverages AI coding tools (ChatGPT, Codex) to accelerate implementation while taking full engineering ownership of system architecture, requirements, deterministic business logic, multi-provider LLM failover, and human-in-the-loop review gates. Backed by rigorous automated testing, iterative debugging, structured databases, and immutable audit logging.

TECHNICAL SKILLS

AI & Agentic Systems: LLM API Integration, Agent Orchestration, RAG, Multi-Provider LLM Routing, Prompt/Context Engineering, Human-in-the-Loop Workflows, Prompt-Injection Defense

Automation & Integration: n8n, Webhooks, REST APIs, Workflow Automation

Backend: Python 3.12, FastAPI, Pydantic v2, SQLAlchemy 2.0, SQLModel

Data: SQLite, PostgreSQL, pgvector, SQLite FTS5, SQL, JSON Schema

Testing & Tools: Pytest, Pytest-Cov, Playwright, HTTPX, Git, GitHub

SELECTED AI PROJECTS

AI Lead Management Agent

[GitHub Repo](#) ↗

Python • FastAPI • Gemini • Groq • OpenRouter • n8n • SQLite

- Built an end-to-end lead intake and qualification platform with multi-channel ingestion (web form, REST API, webhooks), live dashboarding, and immutable audit logs.
- Designed a deterministic 7-factor qualification engine (0–100) with commercial-evidence gating and prompt-injection defenses so LLM outputs cannot independently override high-value decisions.
- Implemented multi-provider LLM failover across Gemini, Groq, and OpenRouter; validated reliability with 68/68 automated tests passing and 81% code coverage.

SupportPilot AI

[GitHub Repo](#) ↗

Python • FastAPI • RAG • SQLite FTS5 • n8n • Gemini • Groq • Playwright

- Built an AI-assisted customer-support platform combining FastAPI, SQLite FTS5 knowledge retrieval (RAG), and a verified 6-node n8n webhook intake pipeline.
- Designed deterministic P1–P4 SLA prioritization, human-in-the-loop review gates, provider failover, strict schema validation, citation matching, and grounded response drafting.
- Achieved 79/79 automated tests passing, 85.92% code coverage, 26 Playwright browser E2E checks, and verified live n8n webhook execution.

OpsForge AI — Multi-Agent Business Operations Platform

[GitHub Repo](#) ↗

Python • FastAPI • Next.js • RAG • n8n • Playwright • PostgreSQL/pgvector • Redis • Multi-Agent Systems

- Built a production-style multi-agent business operations platform that converts high-level business objectives into structured agentic workflows involving planning, research/RAG, analysis, solution generation, QA, and human approval.
- Designed a five-agent architecture with Planner, Research & Grounding, Analyst, Solution/Drafting, and QA & Safety agents, with human-in-the-loop approvals, provenance/citations, prompt-injection defenses, idempotency, audit logging, and controlled side effects.
- Delivered an independently verified portfolio MVP with 32/32 automated tests passing, including validation of FastAPI workflows, Next.js UI, Playwright flows, n8n webhooks, human edit/resume, CRM idempotency, provenance, and security controls.

WORK & OPERATIONS EXPERIENCE

Excel Automation & Operations Executive — Maheshwari Silk Mills

Part-time | Apr 2026 – Jun 2026 | Surat, Gujarat

- Built and improved Excel/VBA inventory and stock-management workflows, including the TOTAL STOCK reporting workflow and operational dashboards.
- Automated recurring stock/reporting tasks and supported product-data updates, including 200+ product listings, to reduce repetitive manual work.
- Prepared inventory/MIS-style operational reports and maintained structured product, stock, and transaction records.

EDUCATION

Bachelor of Commerce (B.Com) — Undergraduate Student

J. Z. Shah Arts & H. P. Desai Commerce College, Surat

Focus: Business Operations, AI-Assisted Software Development, Workflow Automation, APIs, Databases & Technology-Driven Operations
